BTX 1000

Compact Bluetooth receiver with AptX technology

If you own high-quality hi-fi equipment, you really don't want to miss out on the acoustic power of audiophile components. But, on the other hand, sometimes you just want to be as wirelessly free as young people are today with their smartphones and tablet PCs that they always have with them and that deliver music to Bluetooth-capable devices without the need for annoying cables. With the BTX 1000, Oehlbach has introduced the perfect tool for combining the classical world of hi-fi with the modern world of music streaming. This compact Bluetooth receiver may be connected directly to the 3.5 mm line-in, stereo cinch and AUX connectors on stereo and loudspeaker systems and so turn them into Bluetooth-capable components. Which means you'll be able to use your existing hi-fi set-up to play your entire digital library at the highest of qualities. The Bluetooth receiver will also allow you to enjoy music wirelessly on high-quality headphones with 3.5 mm jacks. Oehlbach has used the latest aptX technology to build the BTX 1000 to ensure that it delivers outstanding clarity, performance and transparency in CD quality without any loss in quality. Oehlbach's BTX 1000 also features a comfortable 10-metre range and a battery charge that lasts up to 10 hours.

The Bluetooth receiver may be charged from any normal USB port using the supplied charging cable. It does not come with its own power adapter.
